

2004-2008 work program for French service statistics

Magali Demotes-Mainard, INSEE

18th Voorburg group meeting
Tokyo 2003

Inclusion into the European statistical system

- 
- Structural statistics: extension of the scope covered, additional variables (demand for services ?)
 - Short term statistics: timeliness
 - Producer prices: new surveys to extend the scope covered

Overhaul of the business statistical system

- Earlier integration of survey data and administrative data

reduced statistical burden

improved timeliness

reference data highlighted

- Strategy for surveying small enterprises

Overhaul of the business statistical system

- Taking into account the enterprise group:
 - *group used as statistical unit for some studies*
 - *partial consolidation within the group*
