# Air transport of passengers Index chart 2004

Statistiska centralbyrån Statistics Sweden

## Review 2003/2004

- Burden of respondents increased initially
- Publishing of the index for domestic air transport of passengers discontinued for confidentiality reasons

## PPI for air transport of freight (62B)

- Pre-survey
- 10 enterprises participated
- Model pricing

## Price measurement method (62B)

- Enterprises are asked to select at least 4 representative services
- Index refers to one quarter; if the service was carried out several times during the period, the price data should represent an average

## Index calculation (62B)

- Step 1: the index for each enterprise is calculated
- Step 2: The total index for 62B is calculated by weighting together the indices from different enterprises

# Challenges for the future

- Updating of weights and specifications
- Quality issues
