SEVENTH MEETING OF THE
VOORBURG GROUP ON SERVICES STATISTICS

Williamsburg, Virginia, U.S.A.

19-23 October 1992

*Product, activity and transaction approaches to classifications: a proposal
for an aggregated activity classification compatible with Balance of Payment*

by Marco Lancetti

*Considering the large amount of material to be managed, this document
does not pretend to be a complete analysis of such a complex issue.
Provisional results and proposals are those of the authors and do not
necessarily reflect those of Eurostat.*

*The author has to acknowledge his indebtedness to Ms Monica Redaelli
and Ms Veronique Alaimo for their helpful cooperation
in preparing this paper.*

0. PREFACE

Eurostat is currently carrying out a project concerning the harmonization of concepts and definitions in the services sector. In the framework of this action a preliminary relational database for service classifications is introduced. The results of this activity will be then input into an integrated database server that is also being developed by Eurostat in conjunction with UNSO and INSEE. The relational database, by allowing an easier analysis of the interlinkages among classifications, makes it possible to have feedbacks for the revision of nomenclatures.

The project for a preliminary database was first presented at the sixth meeting of the Voorburg Group held in Helsinki last year. The database will results from the joint effort of two Eurostat units: B5 "Classifications" and D4 "Services, Transport Statistics". This joint effort should increase and consolidate the dialogue between the officials in charge of classifications (unit B5) and the users of these classifications (unit D4).

The objective is to set the base for a general framework in order "to organise a future classification system at a European level, possibly consistent with other existing classifications at world level. The project particularly concerns the services sector aiming:

- *to increase the comprehensiveness and the consistency of the relevant nomenclatures;*
- *to trace and process the increasing number of remarks, proposals, and requests for clarification coming from international organizations, countries and professional associations.*
- *to facilitate linguistic comparisons.*

The whole project takes into consideration classifications following different approaches: products (CPC of the UN and CPA of Eurostat), economic activities (ISIC Rev.3 of the UN and NACE Rev.1 of Eurostat), functions (Intermediate and final consumption), professions (Working methods) and transactions (Balance of Payments); the tourist activity is equally included in the project (see Annex N. 1 for details).

The main idea of the project is to try to link the considered classifications to the detailed items of the CPC (the Central Products Classification of the U.N.) which will assume a central position in this system of information (see Annex 1).

The adopted approach follows the United Nations recommendation on nomenclatures which defines the CPC as the core classification in such a system. This will allow the establishment of correspondences between nomenclatures through the CPC which is the central common element.

The detailed items (or building blocks), which will result from this work will then be aggregated using different criteria to establish the different classifications.¹

Within the framework of the whole project, a study has been undertaken focusing mainly on the relationship between the Eurostat classification of enterprises by economic activity NACE Rev.1 and the joint OECD-Eurostat trade in services classification. The research was conducted on the basis of, on one hand, the existing links between the CPC and the BOP, and, on the other hand, among the CPC, CPA, ISIC Rev.3, and NACE Rev.1.

The results described in this paper should be considered as a first attempt to determine a NACE Rev.1 level which is compatible with the European Balance of Payments. Considering the large amount of material to be managed, this document does not pretend to be a completed analysis of such a complex issue. The proposals presented should be examined by the competent working group and particular attention should be paid to the explanatory notes of the nomenclatures. Further efforts are being devoted to this subject within Eurostat. However the proposals and conclusions which are illustrated in this paper could be taken as a starting point for discussion. The author would like the Group's advice in order to improve the approach and the methodology adopted.

The work presented in this paper shows interesting results that should encourage us to complete and finalize the analysis. Proposals are suggested for the revision of the following classifications: NACE Rev.1, CPC and BOP. Naturally, having a more detailed classification implies by also encountering problems of data collection. However the amount of the proposed additional details is not over ambitious and the costs involved should be compensated by the benefits of having at disposal a more harmonized series of data in a moment when increasing efforts for market liberalization reduce the reliability of sources of information up to now.

1. INTRODUCTION

According to the "Methodological Manual of Statistics on Services Enterprises Chapter General Framework. Version 1.2" (Eurostat), the economic analysis by sector pertains to groups of units which have the same principal activity through reference to an activity classification system, while the analysis by branch refers to groups of units which have an homogeneous production identified by reference to a product classification.²

The statistics by branch are obtained by collecting data on the breakdown of the production of the units observed according to "kind of activity units" or on the breakdown of sales by product. Then, for every product of the classification adopted, the data collected are summed up in order to obtain the total data of a certain branch of economic activity. By grouping the "homogeneous production units" producing the same goods, it is possible to make a transition from "sector statistics" (statistics referring to groups of enterprises having the same main economic activity), to "branch statistics" (statistics referring to a product-by-product breakdown), as seen in the table below:³

"Sector-product" transition

Sectors Products	Sector A	Sector B	Sector C	Sector ii	Production system
Product A	X	X	X	...	Total of products A
Product B	X	X	X	...	Total of products B
Product C	X	X	X	...	Total of products C
Product ii	X	X	X	...	Total of products ii
Production system	Total sector A	Total sector B	Total sector C	Total sector ii	Production System

² Source: Methodological Manual of Statistics on Service Enterprises, Chapter "General Framework". Eurostat. Luxembourg, August 1992. (207-210)

³ Source: *ibid.* (211-212)

"... Insofar as, with a few exceptions, any product can be sold by any enterprises irrespective of its main activity, the observation system must be complete in order to carry out a 'sector-product' transition ...".⁴

From the above considerations it follows that, for a whole economy, only the availability of data on sectors and products can give a complete picture of the "services markets".

Following this approach, for manufacturing sectors, the European Statistics System is based on surveys on enterprises classified by an activity classification system (NACE Rev.1), and on products classified by a list of products (PRODCOM) which is as far as possible CPC compatible.

Data on imports and exports of goods are available according to a Combined Nomenclature that is compatible with the External Trade Harmonized System. Links between the HS and CPC and CPC with NACE Rev.1 have been established. We have then the following interlinks:

ISIC Rev.3 <--> NACE Rev.1 <--> CPC, CPA (or PRODCOM) <--> HS (or CN)

To strengthen the links between the activity and products classification, Eurostat has established a Classification of Products by Activity, CPA.

This work on classifications aims to reduce the number of cells of the sector-product transition table as far as possible to biunivocal links shown in the diagonal of the table.

Data on the breakdown of the production of units observed according to "Kind of Activity Units" classified by NACE will then be compatible with the breakdown of sales by product (classified by CPA or CPC) and with data on imports and exports.⁵

Of course, when data are only available according to sectors of groups of units which have the same principal activity (enterprises), secondary activities will introduce divergences in the sector-product transition.

Nevertheless work on classifications linkages will reduce the distance between the two sets of information.

⁴ Ibid. (212)

⁵ This statement is a theoretical one. Secondary activities of the KAU still could cause some divergences.

2. SERVICES SECTORS APPROACH

The exercise presented in this paper is based on the theoretical framework above outlined and on the ongoing work of Eurostat for the implementation of its project concerning a preliminary database on service classifications. It employs the linkages among CPA, CPC, NACE Rev.1, ISIC Rev.3 established by the Eurostat Unit on nomenclatures and the note on trade in service classification presented jointly by the OECD and Eurostat at the working party of the trade committee held in Paris on September 1991.⁶ Similar to manufacturing, we have then the following interlinks:

ISIC Rev.3 <--> NACE Rev.1 <--> CPC (or CPA) <--> BOP

Despite the fact that the Balance of Payments statistics adopts a transaction approach while the NACE Rev.1 adopts an activity approach, the comparative exercise gave interesting results with regard to the correspondence between the aggregated level of NACE Rev.1 and the BOP.

The above-mentioned joint OECD-Eurostat note on trade in services classification set out links between the BOP and the CPC, mostly at a high level of CPC hierarchy. The first step of the present research consisted in analyzing this note in order to complete and detail the linkage proposed. Every five-digit item of the CPC (the building blocks) was related to a BOP item.

On the ground of the results of this investigation, the structure of the BOP was compared to the structure of the other classifications involved in the exercise (CPA, ISIC Rev.3 and NACE Rev.1) in order to ascertain its coherence with them. This comparison has been done through the existing linkages that each nomenclature has directly or indirectly (double linkage: CPC --> CPA --> NACE Rev.1) with the building blocks of the CPC. The remarks and proposals emerged from the analysis have been examined within Eurostat (see chapter 3 below).

All these elements were entered in a Paradox application and the outcome is presented in the Annex N. 2 as a reference table (it includes the CPC, CPA, ISIC Rev.3, NACE Rev.1 and BOP linkages). Through the presence of the CPC as the central common element, the relation NACE Rev.1 by BOP (see Annex N. 3) and BOP by NACE Rev.1 (see Annex N. 4) were derived from the above-mentioned reference table.

Finally, every BOP item was analyzed in terms of NACE Rev.1 codes and possible aggregations were determined for some indicative sectors (namely, Construction, Transport and Business Services). *The objective was to obtain as far as possible biunivocal links between NACE Rev.1 and BOP, the priority was given to the more aggregated level of NACE Rev.1.* Whenever necessary, further remarks and proposals were made concerning the sectors examined into details (see chapter 4 below).

⁶ Proposals for a joint OECD-Eurostat Trade- in-Services Classification. Paris, 1991. Doc. TD/TC/WP(90)43/REV1.

3. GENERAL REMARKS AND PROPOSALS ON CPC AND NACE REV.1 LINKAGES WITH THE JOINT OECD-EUROSTAT TRADE-IN-SERVICES CLASSIFICATION

1) CPC division 64 (Hotel and restaurant services) and CPC group 747 (Travel agency, tour operator and tourist guide services) have not been linked to the joint OECD-Eurostat trade-in-services classification proposals⁷. Moreover, CPC isolates division 64 as a whole group of products but it inserts group 747 under the division 74 "Supporting and auxiliary transport services". The same is true for the NACE Rev.1 that isolates the HORECA division (NACE /1 55) as a whole group of activities but it inserts the group 63.3 (Activities of travel agencies and tour operators; tourist assistance activities n.e.c.) under the division 63 "Supporting and auxiliary transport services".

A certain correspondence exists between the above mentioned CPC and NACE Rev.1 headings and BOP category "C.2 Travel". All of them refer to a large degree to the same sector of economic activity (tourism). Problems arise from the fact that the international monetary flows coming from tourism activities are included under BOP category C.2 (Travel)⁸ by adopting the criterion of travel purpose (e.g., C.2.1 Business travel, C.2.2 Private travel, etc.) and not according to the nature of the service or the product offered⁹. Consequently, a possible link could exist only at an aggregated level. *However, in order to have a full picture it would be necessary to have a satellite account. Considering the weight of this economic activity in the context of national economy, it would be desirable to conduct a research study on interlinkages of nomenclatures between product and final consumption for tourism in the tourism sector in order to further clarify this point.*

2) CPC classes 7121 (Other scheduled passenger transportation) and 7122 (Other non-scheduled passenger transportation) are linked respectively with NACE Rev.1 classes 60.21 (Other scheduled passenger land transport), and 60.22 (Taxi operation), 60.23 (Other non-scheduled road passenger transport) and 60.24 (Other land passenger transport). However, it does not exist such a subdivision between scheduled and non-scheduled passenger transportation in the BOP classification. It is proposed to split BOP C.1.5.1 (Passenger transportation) at least in two classes on the same line than the correspondent CPC and NACE Rev.1 classes:

BOP proposals	Titles	NACE /1 codes
+ C.1.5.1a	"Scheduled passenger transportation"	60.21
+ C.1.5.1b	"Non-scheduled passenger transportation"	60.22
		60.23
		60.24

⁷ Doc. TD/TC/WP(90)43/REV1.

⁸ "This category covers the goods and services acquired from an economy by travellers (business travellers, students and trainees, excursionists and other travellers) ..." Doc. TD/TC/WP(90)43/REV1, page 8.

⁹ The explanatory note of the BOP C.2 (Travel) states that this category "cuts across the CPC categories". Doc. TD/TC/WP(90)43/REV1, page 5.

3) A similar proposal to the one mentioned above can be apply to BOP C.1.2.1 "Passenger transportation" (ref. Air transport) linked to CPC classes 7311 (Scheduled passenger transportation by air) and 7312 (Non-scheduled passenger transportation by air). As far as NACE Rev.1 is concerned, classes 62.10 (Scheduled air transport) and 62.20 (Non-scheduled air transport) do not refer exclusively to passenger transportation. However, the distinction between scheduled and non-scheduled passenger transportation by air is specified at a more detailed level.¹⁰ Also the BOP structure could be consider a split between scheduled and non-scheduled transportation.

4) The details of the supporting and auxiliary transport services are either included in the groups of the correspondent sectors of economic activity, or under BOP group C.1.8 (Other supporting and auxiliary transport services). It is proposed to change the position of the category referring to "Supporting, auxiliary and other services" BOP C.1.1.4 (ref. Sea transport), BOP C.1.2.4 (ref. Air transport), BOP C.1.4.3 (ref. Rail transport), Bop C.1.5.4 (ref. Other land transport), BOP C.1.6.4 (ref. Internal waterways transport) in order to have harmonization between CPC and NACE Rev.1 classifications. The linkages proposed are the following:

NACE Rev.1	CPC	BOP	BOP Proposals
63.1) Cargo handling and storage		C.1.8	
63.11) Cargo handling	741	C.1.8	+ C.1.8.1
63.12) Storage and warehousing	742	C.1.8	+ C.1.8.2
63.2) Other supporting transport activities		C.1.8	
63.21) Other supporting land transport activ.	7113 743 744	C.1.4.3 C.1.5.4	+ C.1.8.3
63.22) Other supporting water transport activ.	7214 7224 745	C.1.1.4 C.1.6.4	+ C.1.8.4
63.23) Other supporting air transport activities	746	C.1.2.4	+ C.1.8.5
63.4) Activities of other transport agencies		C.1.8	
63.40) Activities of other transport agencies	748 749	C.1.8	+ C.1.8.6

5) CPC groups 753 (Radio and television cable services) and 754 (Telecommunications and related services) are not listed in the BOP-CPC table of correspondence. However, both of them are included in the relevant explanatory notes as part of the BOP sub category C.3.2 (Telecommunication services).

¹⁰ Ref. to CPA 62.10.10 "Scheduled passenger transportation services by air" and 62.20.10 "Non-scheduled passenger transportation services by air". CPA is a Classification of Products by Activities (the activities being defined according to NACE Rev.1) elaborated by Eurostat on the bases of the CPC of the UN.

With regard to the CPC group 753, it should be pointed out that two different types of services are included in "cable services": the installation and the transmission. Only the part of the fee paid for the installation should be linked to BOP C.3.2. The part of the fee paid for the television transmission rights should be linked to BOP C.9.3 (Motion pictures, radio and television services).

It would be appropriated to restructure in this point the CPC classification. This translate in isolating the two types of services included in the CPC 753: the services related to installation should be included in "Telecommunication services" (CPC group 752), and the ones referring to transmission should be included in "Motion picture, radio and television and other entertainment services" (CPC group 961).

Within CPC group 754, CPC class 7542 (Equipment sales services) represents in part the value of the good and in part the commercial margin. These two elements are not separated in the CPC classification. However, if this separation would be present part of CPC 7542 would be linked to BOP A.1 (Exports-fob-), and part should be linked with BOP C.8.1 (Trade services: commission agents' services relating to goods). *The commercial margin is often included in the value of the good . This situation might cause some problems of classification. In fact, the CPC does not always isolate in a different item the commercial margin from the value of the product. In reality, the commercial margin, which represents the real service, should be the only one included in the services sector.*

Some further consideration and discussion are necessary.

6) CPC division 82 (Real estate services) is entirely linked to the BOP C.8.7.4 (Other business services). Problems arise regarding the CPC subclasses 82101 (Renting or leasing services involving own or leased residential property) and 82102 (Renting or leasing services involving own or leased non-residential property) which are related to NACE Rev.1 class 70.20 (Letting of own or leased property). These items should be regarded not as service products but as investments income. *Consequently, CPC 82101 and 82102 should be linked with investments income.*

Problems arise also with regard to the other subclasses of the same section. CPC subclasses 82103 (Residential buildings and land sales) and 82105 (Non-residential buildings and land sales) are related jointly to NACE Rev.1 classes 70.11 and 70.12; and CPC subclasses 82104 (Residential vacant land sales) and 82106 (Non-residential vacant land sales) are linked to NACE Rev.1 class 70.12. They refer to sale of different kind of real estate. Consequently, the capital gains produced by this activity should be linked with the corresponding BOP section.

However, both investements income and capital gains are not strictly products and as such they should not be included in the CPC.

7) At present, CPC subclass 83101 (Leasing or rental services concerning private cars without operator) is only linked to BOP C.8.2.3 "Relating to other transport equipment" (Ref. Operational leasing or rental without operator). However, a part of

this activity concerns also the travel sector. This part should be linked to BOP C.2 (Travel).

8) NACE Rev.1 class 74.15 (Management holding companies) does not have linkage with BOP classification unlike the other classes belonging to the same group (NACE Rev.1 74.11, 74.12, 74.13 and 74.14) concerning the consulting services. This is an open question that required further examination within the discussion upon the definition and the classification of the Overhead expenses.

9) CPC group 886 (Repair services incidental to metal products, machinery and equipment) is not listed in the BOP-CPC table of correspondences. The above mentioned group is strictly related to CPC group 885 (Services incidental to the manufacture of metal products, machinery and equipment), which is linked to BOP C.8.7.3 (Manufacturing services). Consequently, a possible link could be also establish between CPC 886 and BOP C.8.7.3. The same criterion was adopted for "Computer and related services" and "Construction services". Otherwise, an alternative linkage could be establish with category BOP B.2 (Repairs).

10) CPC group 887 (Services incidental to energy distribution) is not listed in the BOP-CPC table of correspondences. A link should be established with BOP sub category C.8.7.4 "Other" (Ref. Other business services)

11) *CPC group 891 (Financial assets and liabilities) is not explicitly listed in the BOP-CPC table of correspondences, because they are capital transactions.*

12) *CPC class 8921 (Patents) is not included in the BOP-CPC table of correspondences. It is proposed to establish a link with category D.1 (Income from patents).*

13) Both CPC classes 8922 (Trademarks) and 8923 (Copyrights) are not listed in the BOP-CPC table of correspondences. They could be linked under the section D (Property income) either in the category D.3 (Other property income) or by creating other headings, such as, respectively, "Income from Trademarks" and "Income from copyrights".

14) Both NACE Rev.1 divisions 75 "Public administration and defence; compulsory social security" (which correspond to CPC division 91), and 99 "Extra-territorial organizations and bodies" (which correspond to division CPC 99), should be linked to BOP even if this linkage is possible only at an aggregated level considering the differences in the various governmental organizations. The correspondence proposed is with BOP items C.10.3 and C.10.4.

15) CPC division 92 (Education services), and CPC groups 931 (Human health services) and 932 (Veterinary services) are linked respectively with BOP C.9.1 (Educational services) and C.9.2 (Health services). These BOP categories are under the section "Other services provided by enterprises". No linkages have been established among the above mentioned CPC items and the BOP section concerning services

provided by the government (BOP C.10.4.3 "Education" and C.10.4.4 "Health"). The linkages proposed are the following:

CPC	NACE Rev.1	BOP
part of 92) Education services	80) Education	C.9.1) Educational services (provided by enterprises)
part of 931) Human health services part of 932) Veterinary services	85.1) Human health activit. 85.2) Veterinary activities	C.9.2) Health services (provided by enterprises)
part of 92) Education services	80) Education	C.10.4.3) Education (Government services)
part of 931) Human health services part of 932) Veterinary services	85.1) Human health activitie 85.2) Veterinary activities	C.10.4.4) Health (Government services)

Besides, it would be more adequate to substitute the title BOP C.9.2 "Other services provided by enterprises" by "Other services provided by enterprises and non-governmental bodies".

16) As above, CPC 933 (Social services), which is related to NACE Rev.1 85.3 (Social work activities), could be linked to BOP section concerning the services offered by enterprises (BOP C.9.4 "Other") as well as to BOP section concerning the services offered by the Government (BOP C.10.4.5 "Other"). The linkages proposed are the following:

CPC	NACE Rev.1	BOP
part of 933) Social services	85.3) Social work activities	part of C.9.4) Other (services provided by enterprises)
part of 933) Social services	85.3) Social work activities	C.10.4.5) Other (Government services)

17) CPC divisions 94 (Sewage and refuse disposal, sanitation and other environmental protection services) and 95 (Services of membership organizations), which correspond respectively to NACE Rev.1 divisions 90 and 91, are not linked to Bop. A possible link could exist with BOP C.8.7.4 "Other" (Ref. Other business services).

18) CPC group 962 (News agency services) is linked to the three digits levels BOP C.7.2.2 (News agencies). In the CPC classification, this item is under the division 96 "Recreational, cultural and sporting services" and so it is for the correspondent NACE Rev.1 group 92.4 (News agency activities). Instead, this item is under the category C.7 "Computer and related services" of the BOP. Considering that news agency services do not necessarily imply computer services, it would be more appropriate to rename the section heading C.7 as follow: "Computer and information services". In order to

improve the harmonization between the structure of NACE Rev.1 and BOP classifications, it could be conceivable to move the services of the "news agencies" under the BOP C.9.4. This would result in a full linkage between NACE Rev.1 division 72 and BOP item C.7.

By the end of this exercise it resulted that some CPC items had to be considered special cases. In fact, besides the products, are also present investments income and labour income. These are respectively identify by Z.1 and Z.2 in this exercise.

Moreover, there are certain CPC items that are not international transactions and as such do not have a link with BOP identified with Z.3.

Problems encountered in other CPC items in relation with BOP are pointed out as unanswered questions (Z.4).

The objective laying behind the addition of these new items represent an attempt of a complete analysis of the two classifications without leaving any element untreated.

4. BOP - NACE Rev.1 LINKAGES FOR CONSTRUCTION, TRANSPORT AND BUSINESS SERVICES SECTORS

Three sectors have been analysed in details, namely the construction, transport and business services sectors. Tables were used in order to get a clearer understanding of the changement proposed and new linkages between NACE Rev.1 and BOP.

The relations are of different types:

- A proposal of addition or removal of a BOP or a NACE Rev.1 item is indicated by respectively a (+) or (-) placed at the head of the columns
- A full (biunivocal) correspondence between BOP and NACE Rev.1 is represented by (X), if it derives from the established link, and by (+) if it derives from a proposal.
- A partial correspondence between NACE Rev.1 and BOP is represented by (I). In order to get a clear understanding of the partial links is necessary to take into consideration the entire row and column of the relevant items.
- A proposed partial linkage between BOP item and NACE Rev.1 item is represented by (+ I), in the case a new linkage is added, and by (- I), in the case an existing linkage is to be removed.
- Special remarks concerning a specific linkage are indicated by (* followed by number).

4.1. CONSTRUCTION SECTION

The following proposals concern the NACE Rev.1-BOP correspondence focusing on the construction section. The table 1 below describes the current situation. It reveals at least four potential biunivocal links between an aggregated level (three digits) of the NACE Rev.1 and the BOP classification. The NACE Rev.1 groups to be considered are the 45.1 (Site preparation), 45.3 (Building installation), 45.4 (Building completion) and 45.5 (Renting of construction or demolition equipment with operator).

N 45.50							□	

The areas * □ are potential full links (X) between BOP and NACE/1. However, further study is required in order to propose a restructuring of the BOP classification so that a complete correspondence with NACE/1 would be possible.

Proposal N.1

The starting point of this research was to restructure the BOP classification in order to obtain a more detailed classification on the same line that NACE Rev.1. A first attempt was done by splitting the residual class BOP C.4.4 (Other) as follow:

Proposed BOP	Proposed BOP title
C.4.4	Site preparation
C.4.5	Building completion
C.4.6	Renting of construction or demolition equipment with operator
C.4.7	Other

With this split it is possible to have a perfect correspondence among the three digits level of NACE Rev.1 and BOP, except for the group NACE Rev.1 45.2. In this case the correspondence exists but only at the four digits level (see tables 1.1 and 1.2).

			equipment with operator	

Proposal N.2

The starting point of this second proposal is to restructure the NACE construction section following the BOP classification; however, a split is proposed also for the BOP classification following the NACE structure (BOP C.4.4 "Other").

The following changes were proposed:

1) The category NACE Rev.1 45.2 (General construction of buildings and civil engineering works) were split in two categories:

45.2) General construction of buildings

45.3) Civil engineering works

The correspondent NACE Rev.1 classes 45.22 (Erection of roof covering and frames) and 45.25 (Other construction work involving special trade) were moved under the proposed NACE Rev.1 group 45.2 (General construction of building); while the NACE Rev.1 classes 45.31 (Construction of highways, roads, airfield and sports facilities) and 45.32 (Construction of water project) were moved under the proposed NACE Rev.1 group 45.3 (Civil engineering works).

2) The BOP item C.4.4 (Other) was split in BOP C.4.1 (Site preparation), in BOP C.4.5 (Building completion) and in BOP C.4.6 (Renting of construction or demolition equipment with operator).

The exercise resulted in a rearranging of NACE classes without disturbing the criteria of the classification. It allowed a perfect linkage between NACE Rev.1 and BOP (see tables 2.1 and 2.2).

It should be noted that through proposals N.1 and/or N.2, a clearer correspondence between the BOP items and the NACE Rev.1 groups (three digits level) could be easier established (see tables 3.1, 3.2 and 3.3).

4.2. TRANSPORT SECTOR

With regard to transport sector, the proposals mentioned in points (2), (3) and (4) in the paragraph three of the present paper (see page 5) have been applied in table 4. The above reminded modifications aimed to harmonize the BOP structure to the NACE Rev.1 classification.

It was proposed to introduce the distinction between scheduled and non-scheduled transportation in the land and air transport services. It was also suggested to create a separate section regrouping the supporting and auxiliary transport services.

Analysing the resulting table 4 it can be noted that the proposed links better harmonize the structure of the two classifications. This is graphically indicated by the presence of a certain number of new full (biunivocal) correspondences. They are marked by the symbol "+".

Moreover, comparing tables 5.1 and 5.2, it is possible to observe that in the latter, which describes the links derived from the proposals, the BOP two digits items could be obtained from a more harmonious aggregation of NACE Rev.1.

22

[illegible]

*1 NACE/1 63 and BOP C.1.8 are perfectly linked except for the presence of NACE/1 63.30.

*3 The present link between BOP C.3.2 and NACE/I 64.20 is perfect. However, it should taken into consideration that part of NACE/I 64.20 should be also linked to BOP A.1, BOP C.8.7.4 and BOP C.9.3.

4.3. BUSINESS SERVICES SECTOR

The following proposals concern the NACE Rev.1 - BOP linkage with regard to the "business sector". The main objective was to modify the BOP classification in order to have a better correspondence with NACE Rev.1.

1) The BOP item C.5.1 (Life insurance and pension funding) was split in C.5.1a "Life insurance", and C.5.1b "Pension funding". This subdivision allowed a better correspondence with respectively the NACE Rev.1 classes 66.01 and 66.02.

2) The BOP category C.6 (Financial services) was restricted to the financial intermediation.

3) With reference to the above mentioned proposal, a new category C.6' (Auxiliary services to financial intermediation and insurance) was created regrouping the services auxiliary to the financial and insurance activities. Consequently, the BOP item C.5.5 (Service auxiliary to insurance services) was moved from category C.5 under the new category C.6'. This should include the following BOP items:

BOP codes	Proposed BOP codes	Proposed BOP titles	NACE Rev.1
	C.6'	Auxiliary services to financial intermediation and insurance	67
C.5.5	C.6.1'	Services auxiliary to insurance and pension funding	67.2
C.6.2	C.6.2'	Services auxiliary to financial Intermediation	67.1
C.6.2.1	C.6.2.1'	Administration of financial markets	67.11
C.6.2.2	C.6.2.2'	Security dealings and related services	67.12
C.6.2.3	C.6.2.3'	Other	67.13

4) The BOP item C.7.7 (News agencies) was removed from the category C.7 (Computer and related services). Following the NACE Rev.1 guidelines this item should belong to the BOP item C.9.4 ("Other" ref. "Other services provided by enterprises").

5) The BOP item C.8.1 (Trade services: commission agents' services relating to goods) was removed from the BOP C.8. It is proposed to isolate it in a new category C.8'. This category is linked to NACE Rev.1 50 and 51.1.

In order to improve the harmonization, further changes were necessary. It was decided to try to restructure the NACE Rev.1 business section following the BOP classification. However a restructuring of BOP was equally necessary in order to reach the objective:

6) Part of BOP item C.8.6 (Advertising, market research and public opinion polling) could be moved under the BOP item C.8.4. The new created BOP item +C.8.4.4 (Market research and public opinion polling) is linked to NACE Rev.1 74.13.

7) NACE Rev.1 groups 74.2 and 74.3 could form a unic group 74.2'. The correspondent classes 74.20 and 74.30 became respectively 74.21 and 74.22. On the same line, the BOP item C.8.5 is split in two sub-items in the following manner:

NACE/1 codes	Proposed NACE/1 codes	Proposed NACE Rev.1 titles	Proposed BOP codes	Proposed BOP titles
74.2	+ 74.2'	Architectural, engineering and other technical consulting activit.	C.8.5	Architectural, engineering and other technical consulting services
74.20	+ 74.21	Architectural, engineering and related technical activities	+ C.8.5.1	Architectural, engineering and related technical services
74.3	+ 74.2'	Architectural, engineering and other technical consulting activit.	C.8.5	Architectural, engineering and other technical consulting services
74.30	+ 74.22	Technical testing and analysis	+ C.8.5.2	Technical testing and analysis

8) The BOP item C.8.7.4 (Other) could be split on the same line of NACE Rev.1 with regard to real estate, placement and supply of personnel, investigation and security services, building cleaning, photographic, packaging, secretarial and other services. It should be noticed that the proposed split is presently considered unacceptable because these are services of proximity and as such not relevant for the BOP. The above mentioned activities are also submitted to juridical restrictions so that their international exchanges are limited. However, the markets liberalisation could have as consequence an increasingly internationalization of these services and justify a further subdivision of BOP item C.8.7.4.

The changes proposed above are clearly visible in the following tables.

The proposals are graphically presented in table 6. It is noticeable that by splitting some BOP items, it is possible to have more full (biunivocal) links indicated by "+".

Tables 8.1 and 8.2 show by proximity, the differences between the present and the proposed links. Evidently neither the logic of NACE Rev.1 nor BOP has been modified; nevertheless, the addition of some BOP items allows a better correspondence with the NACE Rev.1 classification.

26

* * BOP C.8 is a proposed new class (ex C.8.1) with whom part of NACE Rev.1 50 and 51.1 should be better linked.

27

* See proposal n° 18 for details

5. CONCLUSION

The work presented in this paper shows interesting results that should encourage us to complete and finalize the analysis. Proposals are suggested for the revision of the following classifications: NACE Rev.1, CPC and BOP. These could be examined by the competent working groups. Naturally, having a more detailed classification implies also encountering problems of data collection. However the amount of the proposed additional details is not over ambitious and the costs involved should be compensated by the benefits of having at disposal a more harmonized series of data in a moment when increasing efforts for market liberalization reduce the reliability of sources of information up to now.

ANNEX I

Relational table of nomenclatures up to date by the finalization of the CPA

BOP = Balance of Payments
CHGS = Classification of Household goods and services
COFOG = Classification of the Functions of Government
COIP = Draft Classification of Outlays of Industries by Purposes
CPA = Classification of Products by Activities
CPA TOUR = project Classification of products for Tourism
CPC = Central Products Classification
ISCO = International Standard Classification of Occupation
ISIC Rev.3 = International Standard Industrial Classification
"Martini/1" = Classification of Functions for Services
"Martini/2" = Classification of Working Methods
NACE Rev.1 = General Industrial Classification of Economic Activities
NSTR = Standard Goods Nomenclature for Transport Statistics
PROCOME = Nomenclature of Household consumption and other expend.
"Ruyssen" = Main list of Business Services Activities
SICTA = Standard International Classification of Tourism Activities
SITC Rev.3 = Standard International Trade Classification
"P. Smith" = Study on Activity Classification
