RECOMMENDATIONS FOR CHANGES TO THE
TRANSPORTABLE GOODS PART OF THE PROVISIONAL
CPC

Prepared by
THE CLASSIFICATION SUBGROUP
OF THE VOORBURG GROUP

RECOMMENDATIONS FOR CHANGES TO THE TRANSPORTABLE GOODS PART OF THE PROVISIONAL CPC.

The Classification Sub-Group of the Voorburg Group recommends certain changes to the transportable goods part of the Provisional CPC.

The Provisional CPC is a product classification, the goods part of which uses HS six-digit categories as the building blocks of its five-digit categories. The HS has been amended with effect from January 1996. Given the relationship between the CPC and the HS, it is necessary to revise the CPC to realign it with the HS. The necessary changes have been identified by the Sub-Group. It has also recommended certain other changes.

In summary the changes include:

1. Changes to CPC to maintain its links with the 1996 amended version of HS
2. Changes which improve the homogeneity of CPC classes or subclasses.
3. Changes which improve the assignment of CPC categories to ISIC four-digit industries from an industry-of-origin point of view.

The paper reviewed by the Sub-Group and a summary of the approved changes are attached. A final paper will be prepared by the Sub-Group.

The Voorburg Group is asked to recommend to the UN that these proposals be included in the next revision of the CPC and that they make these proposals available to users of the CPC (as provisional changes) as soon as possible, to ensure the relevance of the CPC.

When the goods part of the CPC was created, links were also maintained with SITC Rev 3. (*) No officially rebased SITC Rev 3 has been made public by the UN. In the absence of such a document, it was not possible to realign the rebased CPC with the SITC.

The Voorburg Group is asked to consider whether it wishes to make any recommendation to the UN with respect to the SITC Rev.3 and the work required to correlate it to other systems.

(*)" For transportable goods, all 5-digit items of the SITC are equal to or an exact part of a single CPC sub-class. In this case there is also a reverse relationship in that each sub-class of the CPC is part of only one SITC 3-digit group. In other words complete CPC sub-classes can be aggregated into one SITC group. The correlation between CPC and SITC, Rev 3, is shown in the third column of the classification. Since the SITC deals only with transportable goods, no correspondence between CPC and SITC exists for the remainder of the CPC". Introduction to the Provisional CPC para 47.

US/CAN/EUR proposal, Dumpers are gigantic, not made by truck manufactures, and fit better with mining machinery. Only problem is that there are no free lines in 4442. A re-adjustment is necessary. Since old 44428 has a different ISIC from the rest of 444 it is proposed to move old 44428 to 43570 as already implemented in CPA.

Summary of the approved changes

Summary of changes to annex 1

01230	The industry reference for melons is changed to 0112, but on the product aspect should stay with vegetables as a separate line. The industry reference for locust beans is changed to 0113, but they stay with other vegetables on the product side:
