Passenger traffic, millions per year
Freight transportation, million tons
Water transportation (freights in tons) by country
SBS survey

- EU-regulated survey
- Turnover by product important to National Accounts
- Concentration on economic statistics
  - Service sector in particular
- Demands for decreased response burden
SBS survey

- Administrative data available (Tax data 1997-)
- Πρσ-sampling based on administrative data (2003-)
- Sample of 110 enterprises in Water Transportation
- Pre-printed data (totals) to reduce the response burden
- Annual information on turnover by product for all activities
Questionnaires

• Electronic questionnaires to enterprises > 10 employees (password by mail)
• Paper questionnaires and password to the smaller enterprises
• Pre-printed administrative data (total turnover, total personnel costs etc)
Time table

Reference year t

November t
The population is created from the Business Register

March t+1
Complete questionnaire for the very largest enterprises

August t+1
Administrative data available

September t+1
Sample is drawn, questionnaires sent out

December t+1
Preliminary results are published

June t+2
Definitive results are published, data sent to Eurostat and NA
1. Pre-printed turnover
2. Turnover by products
   2a. Main variables
   2b. Other related variables
   2c. Other products (drop-down)
3. Turnover by client
Number of enterprises 2007
Water transportation data

Water transportation compared to the total business sector

Percent

Number of enterprises | Employees | Turnover | Production value | Intermediate consumption | Value added | Labour cost | Gross investments | Net investments

0.1 | 0.5 | 1.0 | 1.5 | 2.0 | 2.5
Sweden vs Norway (Water transportation)
