# Discussant remarks Office Administrative and Support Activities (ISIC 8210)

**Marcus Fridén**  
**30th Voorburg Group Meeting**  
**Sydney, Australia**  
**September 24, 2015**

# Papers

- Turnover/Output: 1 paper (Poland)
- SPPI: 3 papers (Australia, Israel, UK)
- Some differences in classifications

# Common experiences

- Relatively small industry
- Both Poland and Australia have experienced increases in recent years, in different ways
- Small enterprises are common, need to survey them also

# Poland

- +
- Survey of small enterprises (SP-3)
- -
- CPI used as deflator
- ?
- Is method B and D always the same
- What might be the reason for the increase in recent years

# Israel

- +
- Contract prices
- Large customers, like government
- -
- No SPPI produced
- Bundling with printing, publishing, packaging and designing

# Australia

- +
- Good knowledge of industry
- -
- SPPI still experimental
- Small enterprises have high share of turnover
- !
- Payroll processing

# UK

- +
- A few large enterprises
- -
- Large Other category
- Classification issues
- !
- Direct use of repeated services

# Pricing methods

- Contracts, quality adjustments are challenging
- Unit value
- Prices of repeated services

- Thank you for your attention!
