• ~84% do not have turnover or prices to measure real output
• Good news ~ 3% (5/160) will be aligned soon
Why?

- Motion picture and sound recording not big in a given country?
- Finance data available from alternative sources or other agencies?

According to BEA, in 2015 Motion picture industries were about 0.7% of value added in GDP and Securities activities were about 1.4% of value added in GDP for the US.
Alternative Data

New questions for 2016

Alternative Data Usage

Definition: Alternative data is defined as source data for economic statistics that is obtained using methods other than direct collection by statistical programs. Examples include administrative data collected by other agencies (tax, labor hours, VAT, etc.) and third party commercial data sources such as scanner data or other industry produced data sources.

Does your agency use alternative data to develop your business register (Y/N):

If yes, is the source administrative data or third party data?

Does your agency use alternative data in the development of economic statistical estimates for the services sector?

If yes, please describe the source (administrative or other) and the use.

Additional Comments:
Responses

- 18 of 20 included at least one response
- 14 reported using alternative data for BR
- 15 reported using alternative data in estimates
- Third Party data uses were varied – BR, model results validation, imputation for missing values, directly as estimates
Suggestions for change?

• Maybe specific questions about administrative data?
• Maybe ...?

• More discussion on this during the coming week
