# Outline

- ① Background
- ② Turnover
- ③ Turnover by size class
- ④ Value added
- ⑤ Conclusion

# Background

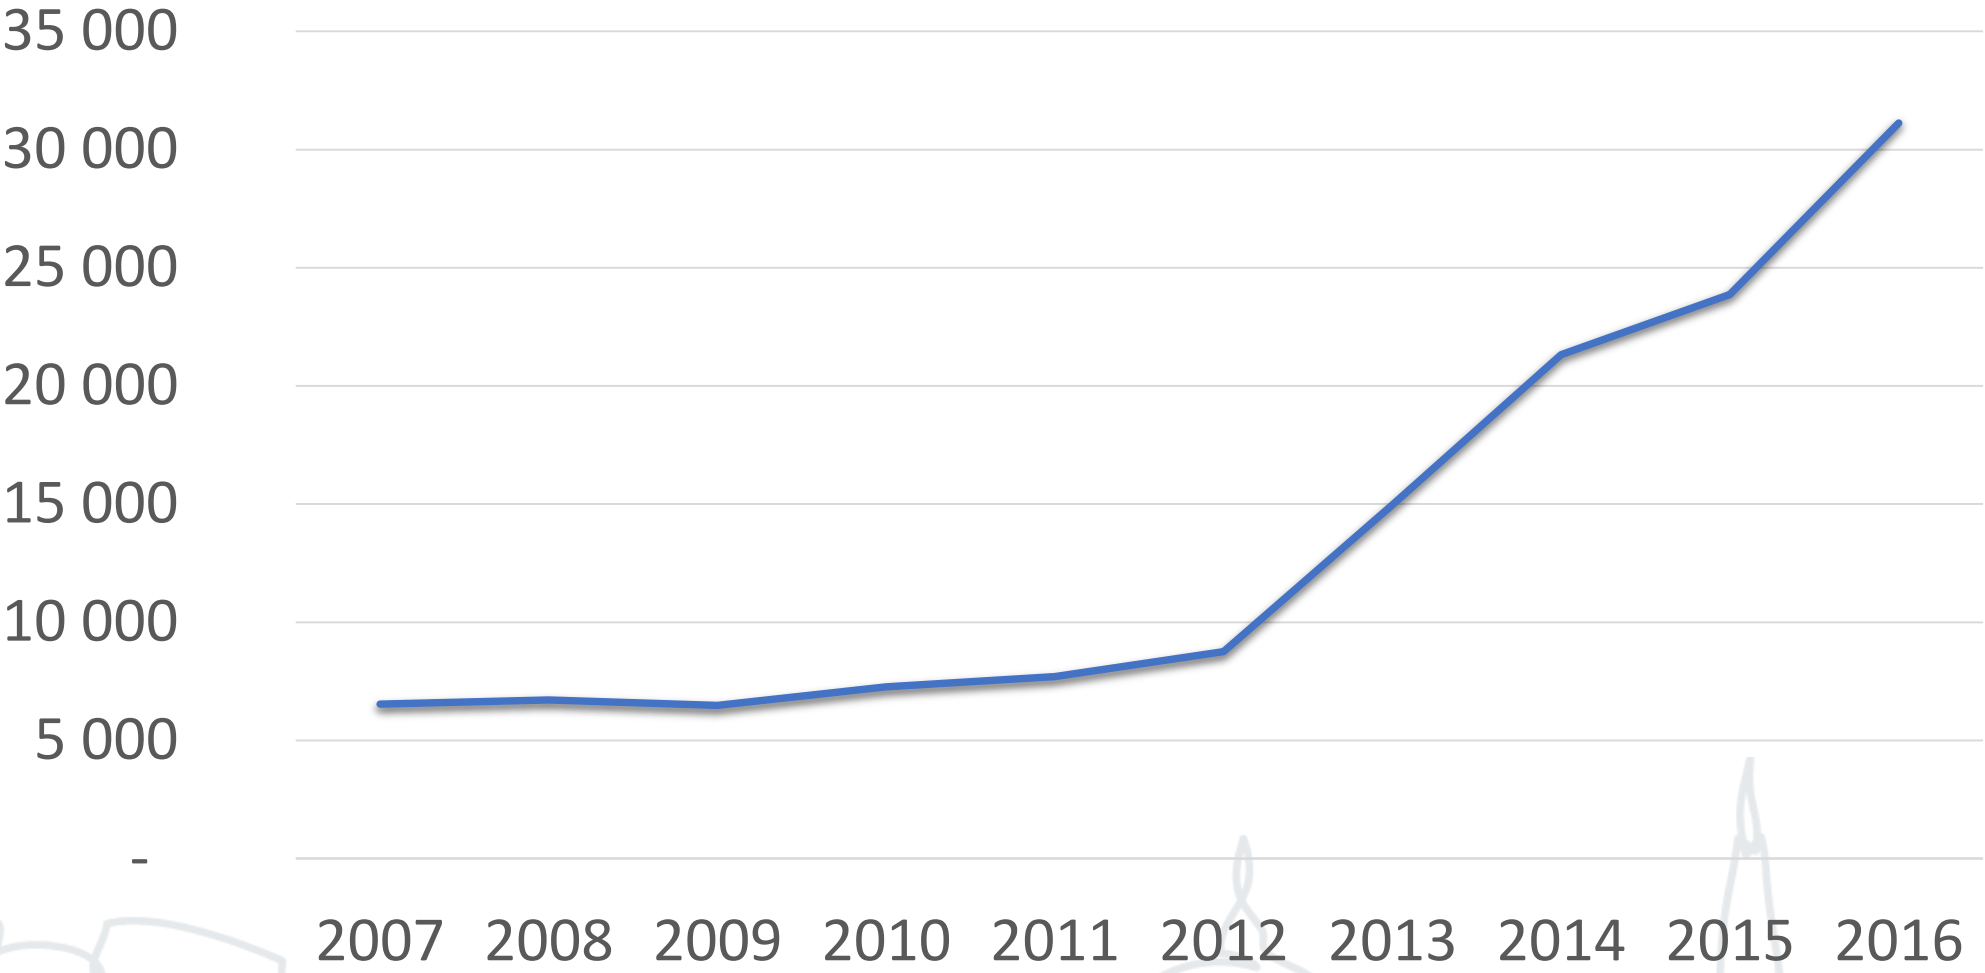

- Turnover is measured in the annual business survey, as part of Structural business statistics, SBS.
- Administrative data for all enterprises in combination with survey data for a large sample
- Classification issues, especially with streaming services

# Conclusion

- Modern industries have a high potential for growth
- The demography of an industry can change
- Expansion costs
