Outreach from the Voorburg group

- To other organisations
- Between Voorburg group members

- Why
 - to reduce the burden on the bureau members and their networks
 - to facilitate interaction and exchange of experiences between countries

- How
 - by introducing a newsletter....
 -to be sent out to other organisations and group members
 -to be placed at the Voorburg group website
 -that we are introducing a possible frame for in the following

Voorburg Group
Q1 xxxx Newsletter

Get to know country x/project x

Some interesting facts about a NSI/ project to increase awareness across Voorburg members.

Example:

The Deflator Research team at the ONS conducts longer term deflator research in close collaboration with the ONS Prices division. Capturing quality change is one of the main areas of focus for this team. Recently the team has been researching quality adjustments for architecture and engineering services. The Deflator Research team can be contacted through emailing Deflator.Development@ons.gov.uk

Noticeboard

Bureau News

- Voorburg 2022-2026 strategic plan is available to read here [Reference Documents \(voorburggroup.org\)](https://www.voorburggroup.org)

International news

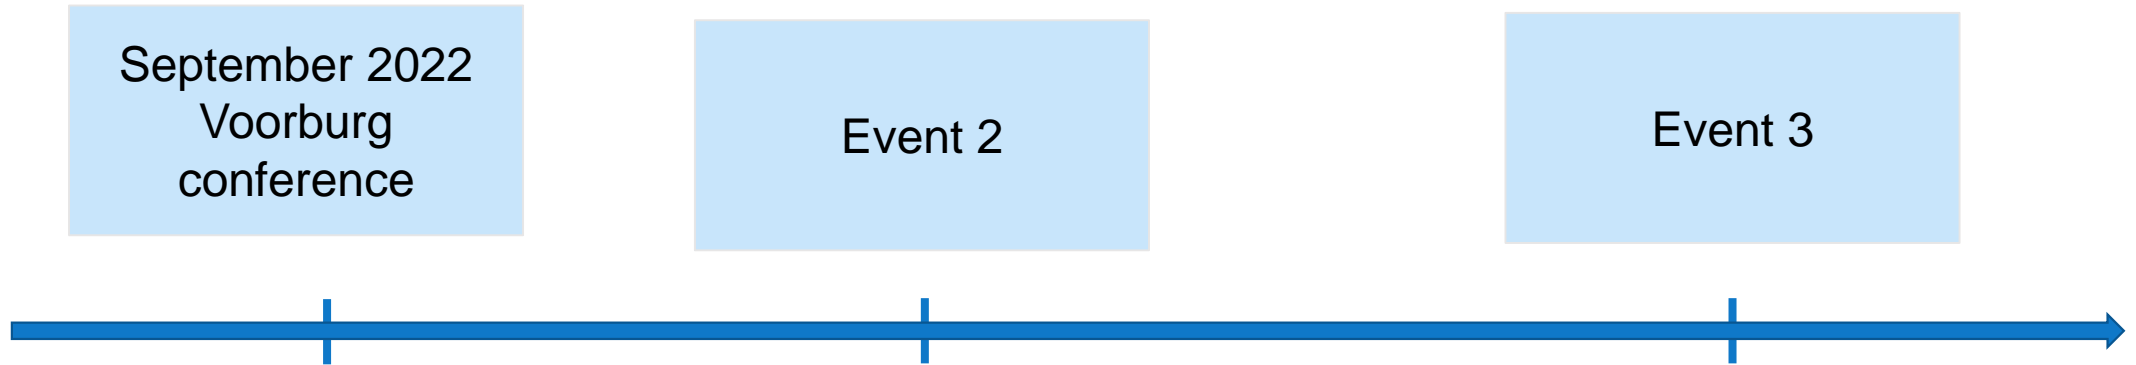

- Ottawa group
- UNECE
- Etc.

Member state news

- Recent successes from implementing new methods
- New members joining

Any other business

Events calendar

Webinars that members might find interesting:

- ['New index number methods in Consumer Price Statistics' - ESCoE : ESCoE](#) presented by Kevin Fox

Call for collaboration

- Voorbug members can showcase projects that they would like to discuss with other member states.
- For example:
 - Deflator Development team at the ONS (UK) is currently developing new deflators for trade in water and air transport services and we would be interested finding out how other NSI deflate these service types for their trade estimates.

Next steps

- Information on projects that member states are working on and would like to discuss with other member states.
- How can the newsletter work in practice?
 - Rotation responsibility among members
 - Two or three with altering responsibility
 -and rolling change of members (e.g. each member part of the team for two years – change of member every year always keeping one with experience)
 - There needs to be some predefined task-list for the responsables to minimise the burden
- First newsletter: Q4 2022 or is it better with Q1 2023?
